

Caelum Modular Mesh Partitioning

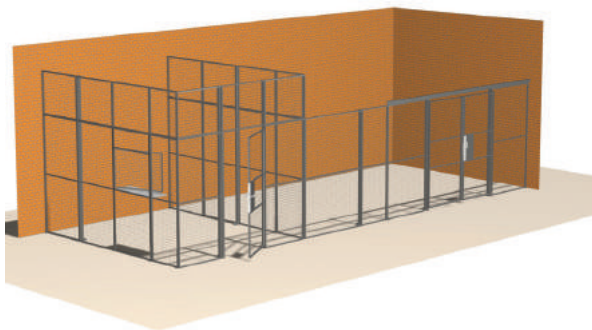

Caelum is a flexible system that can be used to build enclosures, boxes, storage units, and provide protection in automated warehouses.

It is particularly useful in bonded stores, low-level and semi-secure storage areas, and for small cage enclosures where high value retail goods (i.e. Smart phones, mobile telephones, tablets, laptops, computers, power tools, liquor, tobacco, etc.) are stored. A variety of additional features such as digital locks (pricing available upon application) provide increased security for high-value goods areas.

Caelum is available in multi-tiered elevations enabling the end user to partition off large secure storage areas within warehouse environments, particularly useful for isolating and storing dangerous goods such as aerosols or combustible materials.

The Caelum Mesh Wall system is available in a variety of powder-coated finishes, or hot dip galvanised (for outdoor use).
